EDUCATION

Southern Methodist University

Dallas, Texas

B.A., Computer Science, B.S. Data Science, and Business Minor

Expected Graduation, May 2027

- o **Concentrations:** Cybersecurity
- o **Related Coursework:** Principles of Computer Science I and II, Discrete Computational Structures, Data Structures, Computer Organization, Fundamentals of Algorithms, Foundations of Computing, Operating Systems, Artificial Intelligence, Computer Networks & Distribution Systems, Engineering Communications, Ethics in Computing

EXPERIENCE

GM Financial

Irving, Texas

Cybersecurity Intern

May 2025 – Aug 2025

- Developed a threat-based risk assessment methodology, aligning MITRE ATT&CK and NIST frameworks.
- Supported governance and compliance initiatives by building a NIST controls database in an automation platform and documenting issue findings in cross-functional meetings with global teams.
- Enhanced threat detection and response by analyzing Active Directory environments with PowerShell, assessing hundreds of phishing reports, and briefing executive leadership, including the CISO.

BPBots

Southlake, Texas

Founder, Software Developer, Customer Support

March 2021 – Nov 2021

- Founded a company that sold software that automates web processes to achieve maximum online shopping efficiency
- Developed and updated the software used for the product
- Consulted hundreds of customers daily to help with bugs or user issues

Atomic Coffee

Dallas, Texas

Contracted Website Developer

March 2026 – May 2026

- Developed and deployed a website for Atomic Coffee's sister-brand

PROJECTS

Login Security System

Dallas, Texas

Developer

Nov 2024 – May 2025

- Developed a mobile application with a secure login system, initially featuring basic username and password authentication.
- Implemented progressive security features, such as password encryption and two-factor authentication.
- Enhanced data protection through advanced authentication protocols and security algorithms.

Web Scraping Bot

Southlake, Texas

Developer

March 2021 – Nov 2021

- Developed a Python bot using Selenium to automate web scraping and online shopping tasks for BPBots.
- Updated the bot to handle changes in website layouts and security features, ensuring continued functionality.
- Gained experience in automation, web scraping, and working with dynamic websites and security protocols.

ACTIVITIES AND LEADERSHIP

Young Men's Service League

Southlake, Texas

Vice President of Communications

Aug 2022 – May 2023

- Managed communications, social media, and event coverage

Philanthropy Committee

Aug 2020 – May 2021

- Presented on nonprofit partnerships and service initiatives
